Software Engineer Intern

Worked as Intern, which involved understanding & working on Backend Tech.

SKILLS

AWS Services: AWS lambda, API Gateway, SQS, SES, SNS, CloudWatch, CloudFormation, CloudFront, S3 Bucket, Step Functions, EC2 instance, Route 53, ElasticSearch, IoT 1-Click.

Google Cloud Platform: BigQuery, FCM, Google API(Analytics Core Reporting, Search Console, Content API for Shopping)

Golang Frameworks (libs): Gin, GORM, Mux, Negroni, Zap, Fiber, Revel, Gomod, Glide, Viper, Godotenv

Database: DynamoDB, MongoDB, MySQL, PostgreSQL

Back-End Development: Go, Rust, Node.JS, Python

Version Control: Git

Third Party Services:
Payment Gateway : (Stripe, Paypal, CyberSource, Sadad)
Pusher (Real Time API)
Twilio (Cloud communication platform)

EDUCATION

B. Tech- **Dr. B.A. Technological University**, India

PROJECTS

Nexus Chat
Created highly secure chat app with Post-Quantum Cryptography (PQC) Encryption - worked on backend services
Stack : Node.js, Kafka, Self Hosted Servers (vCenter)

Ouikar - Car Parts & Equipments Marketplace
Car Parts & Equipments marketplace from garage partners, thousands of original spare parts.
Stack : Go, AWS, TecDoc (TecAlliance)

Softsolutions Inc- ETCD Cluster API
ETCD is an open source, distributed, consistent key-value store for shared configuration, service discovery, and scheduler coordination of distributed systems or clusters of machines. I wrote APIs on top of the ETCD cluster.
Stack: Go, ETCD

WINNOWPRO - Online Marketing Automated
WinnowPro offers digital sales and marketing solutions, including search engine marketing and social media marketing for auto dealerships, healthcare, etc. I built Backend API Microservices using AWS Serverless Services.
Stack: Go, Node.js, AWS, MySQL, ElasticSearch

Willu — Hashtag Messaging App
Willu allows you to send updates, promotions or alerts using hashtags and get measurable feedback from your followers, without all the noise of clutter. At Willu I built Authentication, payments, notifications, automatic bill generation API Module.
Stack : Go, Node.Js, AWS Serverless Architecture, Vue.js, DynamoDB, ElasticSearch.

Al Ansari Exchange - Foreign Exchange Company
Banking Project - Which is used for Foreign Exchange in UAE.
Al Ansari Exchange is a leading global remittance and foreign exchange company with branches across the UAE. I worked as a Backend developer for their App.
Stack : Java, Spring, Hibernate, Oracle, AWS EC2, Python.

Front-End development:
Vue.js, React.js

Frameworks:
Spring, Nestjs, Express, Spring boot, Servlet, JSP, Sails.js, Serverless, Flask

DevOps Tools :
Docker, Jenkin, Kubernetes, CodeBuild, CloudFormation

Tools: Postman, Jira, Asana, Slack, Trello, Swagger, Mattermost

Interests :
Blockchain
CyberSecurity
AI & ML

Personal Details:

Marital Status - Married

Languages Known :
English, Hindi, Banjara, Marathi

Nationality : Indian

Notice Period : 1 Month Negotiable to 15 days

Visa Status : Golden Visa
